

Mallikarjun Kudalli

+91-9019450015 — kudallimallu1@gmail.com — GitHub — LinkedIn — LeetCode

Professional Summary

Computer Science and Engineering (Data Science) undergraduate at RNS Institute of Technology with strong foundations in Data Structures and Algorithms, Object-Oriented Programming, Database Management Systems, Operating Systems, and SQL. Proficient in C++, Python, JavaScript, React.js, Flask, SQL, Power BI, and Excel with hands-on experience building machine learning, computer vision, data analytics, and software applications. Experienced with Git and GitHub, with a strong interest in full-stack development, product engineering, and building user-focused digital solutions.

Education

RNS Institute of Technology, Bengaluru	2023–2027
B.E. in Computer Science and Engineering (Data Science)	CGPA: 8.07/10
Sri Sahu Maharaj PU Science College, Bidar	2023
Pre-University Education (Class XII)	92.33%
GHS Bhunyar K, Kalaburagi	2021
SSLC (Class X)	97.28%

Technical Skills

- **Programming Languages:** C++, Python, SQL, JavaScript
- **Web Technologies:** HTML, CSS, React.js, Flask, REST APIs
- **Databases:** MySQL, SQLite, MongoDB
- **Data Analytics:** Power BI, Excel, Pandas, NumPy, Data Cleaning, Business Analytics
- **Machine Learning:** TensorFlow, Keras, CNN, OpenCV, Scikit-learn
- **Core Subjects:** Data Structures and Algorithms, OOP, DBMS, Operating Systems
- **Tools:** Git, GitHub, VS Code, Docker

Projects

Fintech Growth & Investment Analytics Dashboard	Individual Project
<i>Python, SQL, Power BI, Excel</i>	
• Analyzed 100,000+ customer transactions and investment records to identify business trends and customer behavior. • Built 5 interactive Power BI dashboards tracking revenue, retention, customer growth, and investment performance. • Developed 30+ SQL analytical queries for KPI monitoring, customer segmentation, and churn analysis. • Generated actionable business insights through data visualization, exploratory analysis, and business reporting.	
Image Forgery Detection Using CNN	Team of 4
<i>React.js, Flask, Python, TensorFlow, Keras, CNN, OpenCV, Git, GitHub</i>	

- Developed a full-stack image-forensics application using React.js and Flask for detecting forged and manipulated images.
- Integrated a CNN-based deep learning model with a Flask REST API for image upload, preprocessing, and prediction.
- Applied image preprocessing and computer vision techniques using TensorFlow and OpenCV to analyze authentic and tampered images.
- Utilized Git and GitHub for version control and collaborative development.

Smart Voting System Using Facial Recognition

Team of 4

Python, OpenCV, Tkinter

- Designed a facial recognition-based voter authentication system using Python and OpenCV.
- Implemented face detection and recognition workflows for registered voter verification.
- Developed a user-friendly graphical interface using Tkinter for voter registration and authentication.
- Implemented duplicate-voter validation to reduce repeated voting attempts within the application.

Certifications

- Cloud Computing – NPTEL IIT Kharagpur
- Data Visualization Specialization – Coursera (Johns Hopkins University)

Achievements

- Solved 100+ Data Structures and Algorithms problems on LeetCode.
